

Erratum

Rotational band on the 31 yr 16^+ isomer in ^{178}Hf
 [Phys. Lett. B 393 (1997) 279] *

S.M. Mullins, G.D. Dracoulis, A.P. Byrne, T.R. McGoram, S. Bayer, W.A. Seale,
 F.G. Kondev

On page 283, an earlier version of Fig. 3 was printed. This should be replaced by the correct Fig. 3 printed below.

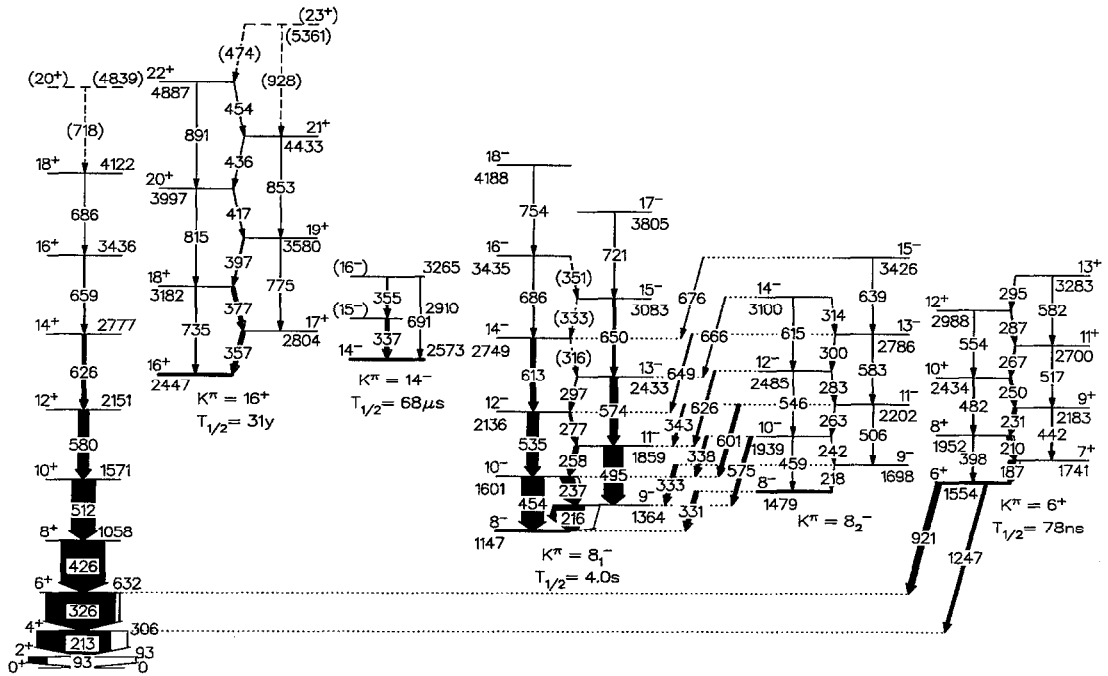

Figure 3.

Fig. 3. Partial level scheme for ^{178}Hf , in which the two new bands built on the 16^+ ($^{178m2}\text{Hf}$) and 14^- four-quasiparticle isomers are shown. In the previously known 8_1^- , 8_2^- and 6^+ two-quasiparticle bands, the states above 14^- , 13^- and 11^+ are new, respectively. Transitions below the long-lived isomers are not shown.
